

CLASSIC DROP SPINDLE

DS09022012V2

- 1 Assemble the spindle. Tie a leader (a piece of yarn 1m/40") to the shaft under the whorl, wrap it around the shaft and under the hook.

- 2 Spin the spindle clockwise and allow the leader to join onto your prepared fibres.

- 3 While keeping the leader pinched with one hand, draft the fibres down.

- 4 Slowly slide your fingers back up the drafted fibres allowing the twist to follow. Once twisted, the yarn will support the weight of the spindle.

- 5 Keep the spindle spinning while drafting more yarn until the spindle reaches the floor.

- 6 Wind the yarn around the shaft to form a cone & then repeat the process. Slide the cone off the shaft and use either as a single or ply 2 together with the spindle spinning anti-clockwise.
